DevOps - Wikipedia

<https://en.wikipedia.org/wiki/DevOps>

Overview

Contents

Definition

History

Toolchain

DevOps is a software development methodology that combines software development with information technology operations. The goal of DevOps is to shorten the systems development life cycle while also delivering features, fixes, and updates frequently in close alignment with business objectives. The DevOps approach is to include automation and event monitoring at all steps of the software build.

What Is DevOps? | the agile admin

<https://theagileadmin.com/what-is-devops>

DevOps is a term for a group of concepts that, while not all new, have catalyzed into a movement and are rapidly spreading throughout the technical community.

What is DevOps? - Definition from WhatIs.com

<https://searchitoperations.techtarget.com/definition/DevOps>

DevOps is the blending of the terms development and operations, meant to represent a collaborative or shared approach to the tasks performed by a company's application development and IT operations teams.
